*Type of Request:* Extension and revision of a currently approved information collection.

*Abstract:* The primary objective of the National Agricultural Statistics Service is to prepare and issue State and national estimates of crop and livestock production. The Egg, Chicken, and Turkey Program obtains basic poultry statistics from voluntary cooperators throughout the Nation. The data are used to prepare and issue current State and national estimates. Statistics are published on placement of pullet chicks for hatchery supply flocks, hatching reports for broiler-type, egg-type, and turkey eggs, number of layers on hand, total table egg production, non-federally inspected poultry slaughter, and production, disposition, and income estimates for eggs, chickens, and turkeys. Non-federally inspected poultry slaughter data are obtained from State Department of Agriculture.

The statistical information is used by producers, processors, feed dealers, and others in the marketing and supply channels as a basis for production and marketing decisions. Government agencies use these estimates to evaluate

poultry product supplies. The information is an important consideration in government purchases for the school lunch program and in formulation of export-import policy.
